

EDLIN - ML Framework

Edlin (Kuzman Ganchev and Georgi Georgiev, [Edlin: an easy to read linear learning framework, RANLP, 2009.](#)) is Ontotext's machine learning framework, written in JAVA, and designed to be easy to read and understand. It was started by Georgi Georgiev and Kuzman Ganchev and is now actively developed by the Text-Analysis team of Ontotext and become a fully featured, big data, enterprise grade machine learning framework.
